

**Errata**

The panels for math and reading achievement are reversed for **Figures 3.1 and 3.2** (pp. 58, 60). The correct figures appear on this errata sheet.

Also, in the “Home Demographics” section of the appendix (page 88), the number of older siblings variable is collapsed into four groups: no older siblings, one older sibling, two older siblings, and three or more *older* siblings. Finally, endnote five should refer to Figures 3.1 and 3.2, not 2.1 and 2.2

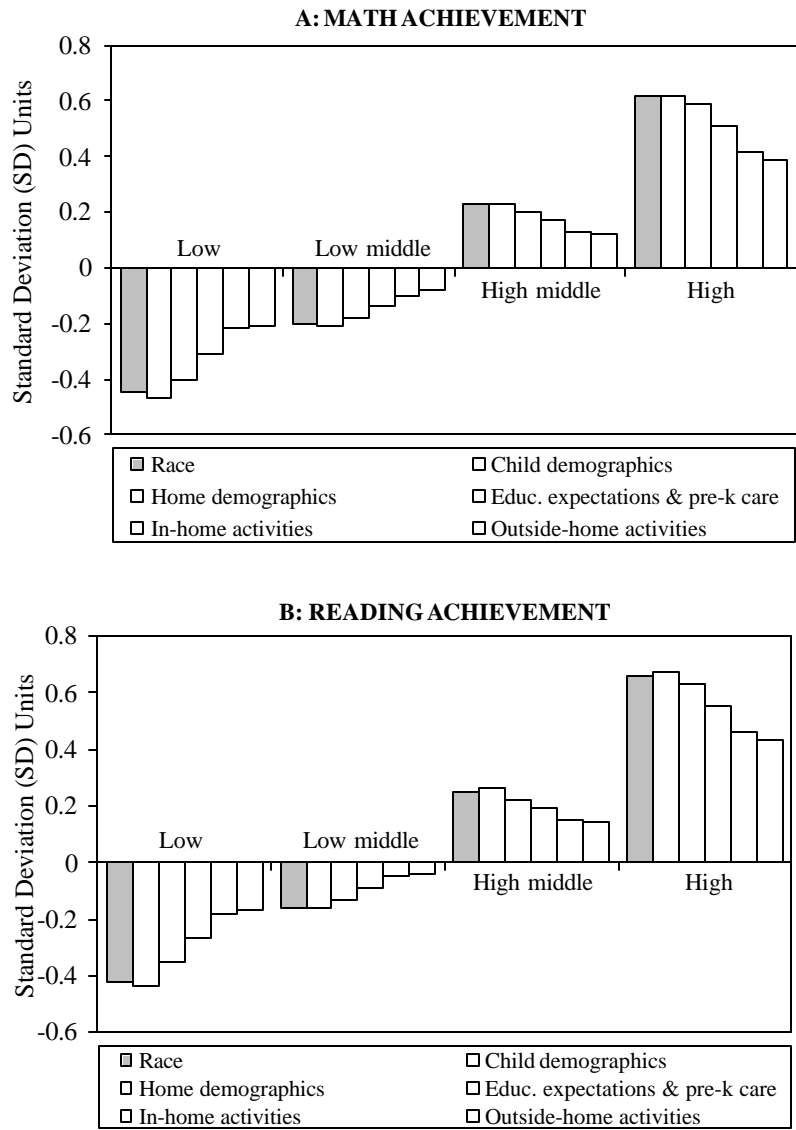

FIGURE 3.1 Adjusted race differences, in effect sizes (compared to whites)
